## Background

Established in 1974, Frame UK have built an enviable reputation in the design, manufacture and construction of environmentally friendly and thermally efficient quality timber frame buildings and associated products with specifications and packages tailored to meet requirements and budgets.

An increase in demand for timber frame buildings has resulted in Frame UK investing over £4 million into a 95,000 sq ft fully automated factory on a 4.5 acre site. With two fully automated production lines and a third line commissioned, Frame UK will have created one of the largest timber frame manufacturing plants in the UK.

## Timber

All our timber is treated and supplied from sustainably managed FSC certified forests. This ensures forest management is effectively controlled and regulated with a minimum of two trees planted for every one used.

## Partnerships

Frame UK is committed to working in partnership with our clients in promoting, producing and improving our natural environment. We recognise that sustainability is an important issue and believe that we as a manufacturer have a vital role to play in its delivery and are committed to meeting the challenge of making all our procedures, products and services more sustainable through a rolling programme.

## Procedures

Frame UK has long adopted the Chain of Custody systems and integrated this into its own ISO procedures providing our clients with evidence of receipt of certified timber products. Registered with BM TRADA certification in taking the next step towards FSC and PEFC certification is in many ways formalising our commitment to the environment and our customers.

We produce detailed construction drawings with strict quality control procedures, enabling us to oversee every stage - from initial design to the manufacture and site erection of the project. Our design flexibility comes from using today's most advanced technology in machinery and computer software.

Housing developments.

Housing developments.

Frame UK continue to develop successful working partnerships with Housing Developers, Social Housing Groups, Contractors, Architects, Local Authorities, Health Authorities, the Ministry of Defence, the Sports Council and the Commercial, Education and Leisure sectors.
