

## Frame UK – In House Structural Engineer

### **Job Profile.**

We are seeking to expand our in-house Design Disciplines and looking to recruit a Structural Engineer

Ideal candidate will have a passion for building with timber and advancing truly sustainable building designs. Is to have a structural design background with a First class, 2.1 or higher university degree in a related discipline, ideally you will be a Chartered (or nearly Chartered). An awareness of latest developments in the field of research, with a deep interest in timber engineering and ecological buildings.

Frame UK's Structural Engineer will be a key member of the Frame team and responsible for the successful, effective and commercial efficient engineered design of all timber frame structures manufactured.

As part of this role you will be completing Calculations for all new projects, liaising between the pre-construction and estimating teams and input to estimates and managing technical issues, liaising with internal and external individuals as part of the design process.

Produce full sets of structural timber frame calculations for each project.

Update and coordinate any design changes, maintaining a register of changes.

Coordinate and liaise with external parties such as architects, Engineering Consultants and Specialists.

Coordinate and distribute supporting paperwork to the design manager.

Provide specialist technical design information & Support to the Frame Homes team.

Manage technical questions and queries generated during the estimating and manufacture process.

Mentor for a newly established in house structural engineering training scheme

The above is an inclusive general outline but not exhaustive.

### **Candidate Profile.**

Degree qualification in Structural Engineering (Preferred) Ideally Chartered or looking to achieve this Status.

Ideally have a proven track record in the structural design of timber frame projects and to run projects with minimum supervision

Flexible approach, working within an established team environment

Working Experience of the UK Construction Industry in a Structural Engineer Role.

**Attractive Package Offered Dependant on Qualification & Experience**

**Part Time or Full-Time position considered.**

### **How to apply**

Candidates should apply by completing the attached application form, submitting a CV and a covering letter setting out why they feel they are suited to the position.
